

RMC FRIDAY FOCUS – Science Museum of Virginia!

November 10, 2017

Each year, hundreds of thousands of guests learn about a wide variety of subjects through “experiential exhibits, awe-inspiring artifacts and interactive technologies” at the Science Museum of Virginia!

With permanent exhibits on science, technology, engineering and mathematics, there is always something new to learn at the Science Museum. The Museum’s Dome theater is the largest screen in Virginia at 76 feet, and features live astronomy presentations, “Cosmic Expeditions”, and much more on the most advanced digital dome theater in the world.

The Science Museum of Virginia also recently unveiled its newest addition, the Dewey Gottwald Center. With “contemporary finishes and a dynamic floor plan”, this beautiful modern building is perfect for conferences, lectures, and a variety of other events. RMC Events is proud to announce a new partnership with the Science Museum of Virginia, and we are very excited to help provide event staff to such an amazing fixture of the community!
